CONSTRUCTION SOLUTIONS

COST EFFECTIVE, HIGH QUALITY
CUSTOM CASTINGS AND FORGINGS

H-E PARTS HAS PROVIDED BEST IN CLASS TECHNOLOGY
AS A RELIABLE PARTS ALTERNATIVE SINCE 1932.

**H-E PARTS IS THE
PREMIUM GRADE
ECONOMICAL
ALTERNATIVE
TO IN-HOUSE
FABRICATION.**

"With the larger traction style cleats we had in mind we also needed them to be cost effective. We called on the H-E team and their sales and engineering staff for help designing 3D models for production. Within 2 months we had samples in hand and 5 months we had cleats working in landfills."

— G-N Compaction

COMPANY HISTORY

The custom casting program started in 1984 as an expansion of our wholesale business dedicated to bucket teeth, adapters, cutting edges and compactor components. As the business grew, H-E Parts took the opportunity to offer reverse engineering and casting services to companies fabricating components. Offering components as finished castings saved customers production time and expense.

REVERSE ENGINEERING CAPABILITIES

- Advanced Tooling and Capture Technology
- Highly Accurate Design and Modeling
- Complete Prototyping and Testing Facilities
- Multiple Manufacturing Sites
- World-Class Quality Control
- Flexible Volume and Freight Options

**ECONOMIC AND SUPERIOR
QUALITY ALTERNATIVE TO
IN-HOUSE FABRICATING**

- Fast Turnaround
- Low Development Costs
- Private Labeling
- Any Steel Specification
- Castings
- Forging
- Machining
- Engineering
