

MECHANICAL

Cylinders

From hoist to steering cylinders, HEPI provides expert solutions that ensure reliability and performance. Each cylinder is inspected, repaired, and remanufactured to HEPI's own engineering specifications, utilizing proprietary tooling and repair procedures to deliver rapid turnaround times and long-life rebuilds. All HEPI cylinders undergo rigorous testing before, during, and after the manufacturing process to guarantee unmatched quality.

- Expertly repaired and remanufactured hoist and steering cylinders.
- Proprietary tooling and repair procedures for quick turnaround.
- Rigorous testing ensures reliability at every stage of production.
- Additional services include chrome plating, grinding, and polishing.
- Solutions designed to maximize performance and durability.

Advanced Cylinder Solutions

HEPI specializes in the inspection, repair, and remanufacture of hoist and steering cylinders, tailored to meet your equipment's toughest demands. Our proprietary tooling and repair procedures ensure rapid turnaround times and reliable rebuilds for prolonged equipment life.

Every cylinder undergoes rigorous testing during the manufacturing process to meet the highest quality standards.

HEPI also offers a range of additional services, including:

- Chrome Plating
- HVOF (High Velocity Oxygen Fuel)
- Grinding and Polishing
- Machining and Fabrication
- Surface Finish Analysis
- Alternative Coating Solutions
- Failure Analysis
- Assembly and Testing
