

POWERTRAIN

Wheel Motors

HEPI (H-E Parts International) specializes in the re-manufacture of major mobile equipment components, focusing on driveline solutions. Our electric wheel motors, including popular models like the **Komatsu GDY 85 and GDY 106**, provide industry-leading performance, longevity, and ease of maintenance. With decades of experience in re-manufacturing over 10,000 wheel groups, we continually enhance the design of our electric wheel motors to address issues with OEM designs and improve overall performance. Our proprietary designs offer extended life, ease of maintenance, and superior performance for loaders, haul trucks, and other heavy equipment.

- **Popular Models:** Our electric wheel motors include the **Komatsu GDY 85 and GDY 106**, two of the most reliable models in the industry.
- **Improved Performance:** With decades of experience re-manufacturing over 10,000 wheel groups, HEPI engineers enhance electric wheel motor designs to address OEM issues, boosting longevity and reliability.
- **Cost-Effective Solution:** Re-manufactured electric wheel motors reduce downtime, lower maintenance costs, and extend equipment life cycle.
- **OEM-Compatible:** Our electric wheel motors fully match OEM specifications for seamless integration with your

Find the Electric Wheel Motor You Need

HEPI provides comprehensive drivetrain solutions with a strong focus on electric wheel motors. Our popular models, including the Komatsu GDY 85 and GDY 106, are designed to deliver superior performance and reliability. By leveraging decades of experience in re-manufacturing more than 10,000 wheel groups, we continually enhance the design of our electric wheel motors to address issues with OEM designs and improve overall performance.

- Our proprietary designs offer extended life, ease of maintenance, and superior performance for loaders, haul trucks, and other heavy equipment.
- We utilize specialized alloy steel, advanced heat treatment, and strict manufacturing tolerances to exceed OEM specifications, ensuring our gearing sets meet the highest standards.
- Additionally, we offer service exchange options on certified transport frames that comply with load restraint guidelines, ensuring smooth delivery and installation.
